

NIELIT Virtual Academy

COURSE PROSPECTUS

Name of the Course: *Certificate Course in React-JS*

Course Code: SP34

Mode of Conduction: *Online[Self-Paced]*

Duration: 30 Hours

Objective of the Course

React is an open source Java Script Library. React-JS allows developers to utilize individual parts of their application on both the client-side and the server-side, which ultimately boosts the speed of the development process. Now a day it is widely used in IT Industries for application development. The main objective of this course is to make participants conversant with React-JS such that he can develop a basic application using React-JS technology.

Outcome of the Course:

- Understand the programming model provided by the React framework.
- Having a certificate in React JS can enhance resume of participants and make them more attractive to employers, particularly those seeking web developers proficient in modern frontend technologies..
- With React JS being widely used in the industry, completing a certificate course can open up job opportunities as a frontend developer.

Course Fee: Rs: 600/- (inclusive of GST)

Eligibility: +2 with Programming Knowledge

Methodology:

- ✓ Teaching Mode: Self-Pace
- ✓ Access from anywhere anytime
- ✓ Content Access through e-learning portal
- ✓ Doubt Clearing Session
- ✓ Practical Oriented

Contact Details:

- Course coordinator Name: Mr. Harish Ramachandran
- Email: trng.chennai@nielit.gov.in
- Mobile number: 07598730125/6374986782

Contents:

1. HTML

- ❖ Introduction to HTML and various tags: div, section, article, span
- ❖ Inline & Block elements, HTML Forms, Input elements and attributes, Submitting a form.

2. CSS

- ❖ Introduction to CSS, Using properties, Using various display properties.
- ❖ Understanding box model: padding, margin, border Flex - display, direction, wrap, flex-flow, justify-content, align-content

3. Javascript

- ❖ Introduction to Java Script.
- ❖ Control Statements, Array & Objects, DOM, Functions
- ❖ var vs let vs const block scoping spread & rest operators array & object destructure Object property shorthand Template literals
- ❖ Copy by value and Copy by reference Window & document object Array and JSON
- ❖ Document - createElement, setAttribute getElementById, querySelector vs querySelectorAll innerHTML vs innerText appendChild vs append"
- ❖ Window - Common Util functions setTimeout vs setInterval prompt, Alert, confirm working with events

4. REACT

- ❖ Introduction to React, React Configuration, Setting Up React Project
- ❖ Understanding JSX Components & Props
- ❖ Working with array lists, Usage of keys, Conditional rendering, Handling Events, Props & state.
- ❖ Components & Hook
- ❖ React Router
- ❖ Intro to Redux - to understand the state management with react application

5. Mini Project

Examination & Certification

Category	Theory	Project		Total
Paper Name	No. of Papers:01	Project	Presentation	
Marks	40	30	30	100

After successful completion of the course, candidate will get an online certificate with the following Grading Scheme:

Marks Range	Grade	Certificate Type
85% and above	S	Graded
75-84%	A	Graded
65-74%	B	Graded
55-64%	C	Graded
50-54%	D	Graded
<50%	F	Participation
Attended the Course but not appeared in Examination	N	Participation
